VetMedCare – Dog&Cat Bodysuit

No More Lampshades

Dogs and cats sometimes undergo surgery in the abdominal and genital area, e.g. castration, removal of breast glands, etc.

After surgery, the protection of the surgical wound is a central concern. For this purpose, the **dog&cat bodysuit** was developed in close collaboration with veterinary surgeons.

VetMedCare – Leg Protection

The ideal solution for leg injuries:

- Can easily be firmly attached to the **dog&cat bodysuit** in the **needed length**.
- Cannot be peeled off by the animal.
- Can be removed with a **CLICK**.

The **dog&cat bodysuit** remains intact and can continue to be used.

For males and females

Depending on the operation, the rear genital area may need to be more or less covered. For this purpose we have developed special bodysuits for male and female dogs.

Material & Sizes

The **dog&cat bodysuit** is made of **skin-friendly wash-and-wear material**. Its elasticity and perfect fit ensure high wearing comfort.

The front and back leg openings have special **flat and stretch seams** that help to **avoid unnecessary sores**.

The belly area is fully smooth, as the seam runs along the back.

Colour:  **greenish blue**

Sizes: XS, S, M, L, XL, XXL

Breeds: Yorkshire Terrier, Maltese, Pekingese, Miniature Poodle, Dachshund, Spitz, Jack Russel Terrier, Dalmatian, Fox Terrier, Doberman, Alsatian, Golden Retriever, Rottweiler, St. Bernard, etc.

Advantages

the **dog&cat bodysuite** allows freedom of movement. Other benefits:

- Hygienic
- Practical
- Comfortable
- Efficient
- Washable
- Usually allows animals to urinate and do their job

Easy Handling

The **dog&cat bodysuit** protects sensitive areas from dirt, scratching, and licking. Thus, veterinary care is ensured over an extended time.
